

I have walked many paths and one thing that has always remained constant is my love of creation. Whether I am writing a song, building a house, or developing an app as a software engineer, nothing is more satisfying than stepping back and seeing what I have helped create.

SKILLS

- JavaScript, React, NextJS, Astro, MongoDB, Mongoose, PostgreSQL, Sequelize, GraphQL, Apollo, Express, HTML, CSS, ProTools, Logic, Git, Trello, Submittal Exchange, MS Office
- Flexible team player with the ability to effectively lead, manage, and execute multiple projects simultaneously

EDUCATION

General Assembly Software Engineering Full Immersive Cohort 2-22

February 2022 - May 2022

12 week intensive course that built fluency in full-stack web development with emphasis on work-ready skills.

- Record Reveal - A simple match game using vanilla JavaScript, HTML, and CSS, where the player must match music related symbols to display a piece of album artwork that is pulled from the discogs API.
- Backlog - A MERN stack app that allows users to create a log of video games they are currently playing, want to play, and have completed.
- WorkTrack - A PERN stack app that lets business owners track their employees hours.
- Co-Lab - A PERN stack app that lets users create an account and upload their unfinished songs. Users are also able to explore other user's tracks and ask to collaborate on them.

S.A.E., New York, NY | Audio Engineering Certificate

September 2005 - June 2006

Focus on proper audio recording techniques, business and project management as well as electrical and acoustical engineering.

EXPERIENCE

Downloadcodemanager.com | Developer, Co-Owner

June 2022 - Current

- Designed and built backend database and API
- Implemented front end logic to connect with backend
- Built with Next.js, sequelize, postgres. Deployed using Cpanel

RW Adler Builders | Project Manager

March 2021 - December 2021

- Defined, prioritized, and managed projects in collaboration with clients, architects, and contractors
- Scoped and estimated projects, providing a cohesive breakdown of expectations and milestones to client to ensure complete transparency and satisfaction
- Created and managed budget and project plan
- Advised clients on contractor selection and ad hoc decisions throughout the building process

Cornerstone Construction, LLC | Supervisor

March 2017 - April 2020

- Responsible for subcontractors including footings and foundation, concrete superstructure, precast exterior panel install, waterproofing, caulking, roofing, pavers and glazing
- Provided regular updates to owners, owner's reps, and senior management
- Created daily reports including man count, work completed, and materials delivered
- Responsible for uploading and organizing all submittals, inspections, certificates, daily pictures, and time sheets to submittal exchange.

Treehouse Sound | House Engineer/Project Manager

November 2011 - December 2016

- Utilized ProTools, Logic, and various audio plugins to track and mix musical performances
- Collaborated with business manager on company roadmap
- Ran day to day operations including client retention, scheduling, and upselling
